q: Jane thought today is 3/11/2002, but today is in fact Mar 12, which is 1 day later. What is the date a month ago in MM/DD/YYYY?

y_0: 02/11/2002

q, y_0

Target: 02/12/2002

Explanation: *The model might have misunderstood the phrase '1 day later' in the context of the question. It appears to have calculated the date a month ago from the incorrect 'thought' date instead of the correct current date.*
